1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest a CD molding apparatus as defined in the claims of the instant application. The closest prior is demonstrated by Japanese Pub. No. 09-155934 (hereinafter "JP '934"). JP '934 discloses a disc molding die. The die includes a gas passage (26b) defined between an outer ring (25) surrounding the mold cavity (3), and a fixed mold half (1). The gas passages connects the mold cavity and an outlet (16). JP '934, however, fails to teach or suggest an auxiliary gas channel disposed in the fixed mold half and connected to the gas passage as recited in claim 1 of the instant application. Moreover, there is no apparent reason given in the reference or other prior art for such a modification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
